PRESS RELEASE

Announcement of India Science and Research Fellowship (ISRF) Programme 2022-23

The Embassy of India is pleased to inform that the ISRF has launched the Fellowship Programme 2022-23 for *Afghanistan, Bangladesh, **Bhutan**, Maldives, Myanmar, Nepal, Sri Lanka and Thailand* researchers. A maximum of 10 fellows may be selected from each country to work in the Indian Universities and Research Institutions.

2. The Fellowship would provide opportunities for mid-career scientists/researchers, with minimum academic qualification as Ph.D/M.Tech/M.Sc. and 4-6 years research/teaching experience, to undertake research in Indian R&D institutions. The Fellowship would cover travel allowance (return air fare), sustenance allowance, contingency grants and medical facilities.

3. The ISRF Programme, launched in 2015, is part of India's initiatives to engage with neighbouring countries to develop S&T partnerships. This has provided opportunity to the young researchers from these neighbouring countries to get access to the state of art facilities available in the Indian institutes.

4. The last date for submission of applications is 15 October, 2022. The brochure and application form for the ISRF 2022-23 Programme can be accessed through the following link:
